- Suspension Storage System - Modern wire system for arrangement of storage places.
- The system includes 29 elements, combination of which gives ability to create various designs.
- Elements are produced in China and Russia.

The Advantages of the System

- The system applicable for various rooms and spaces. Because of several possible ways of mounting - the system can be fixed to the wall or inside of the cabinet.
- Individual solution for each person according to his needs.
- You can always reconsider the purpose of storage, swap shelves, purchase the necessary elements, and when move to a new place take it with you.
- Wire shelves provide ventilation, clothes remain fresh and odorless.
- Open storage - things are in place and do not get lost, easily viewed.
- Easy to assemble. Self-installation does not require professional assistance.

Suspension storage system can be installed in 3 ways:

On the Wall:

1 With Top hung Rails

- Top hung rails attached directly to the wall
- Convenient when installed in non-standard rooms with ledges and bevels
- Total cost reduction

2 With Bearing Track

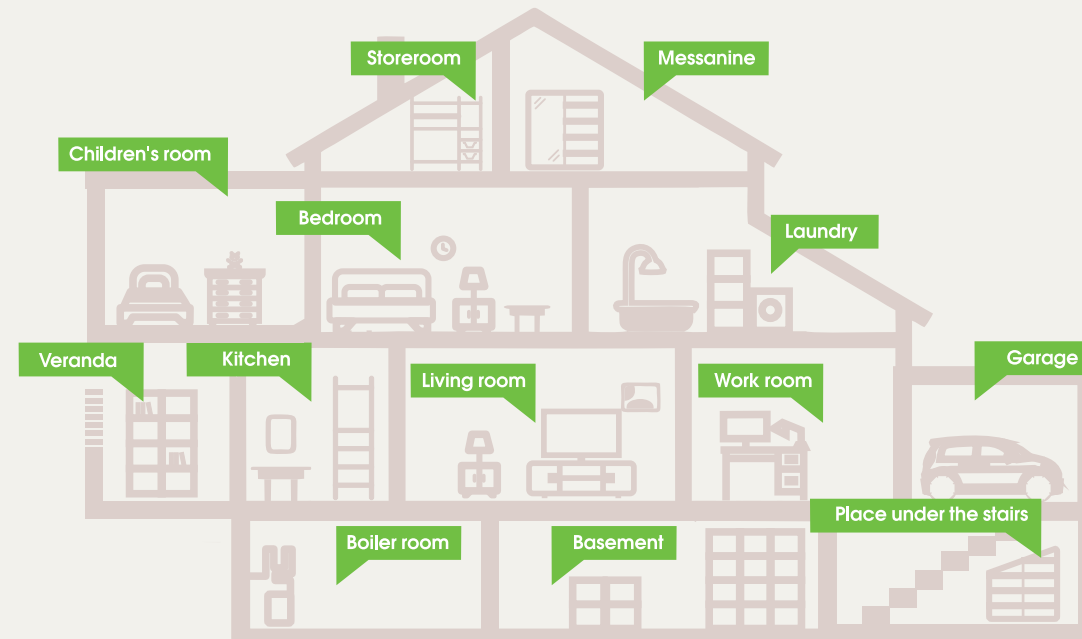

- Bearing Track - the only element that mounted to the wall
- Minimum damage to the walls
- Easy installation

In the Cabinet:

3 With Side Holders

- Applicable for cabinets and built-in wardrobes
- Side walls of the cabinet are used for fastening the elements
- You can install stationary and pull-out elements on the side holders
- Total cost reduction of the constructions

* When installed on 3 brackets

- Impact resistance - coating resistant to mechanical stress and abrasion.
- Environmentally friendly - does not contain harmful organic compounds and do not emit harmful substances into the air.
- The system is resistant to high temperature and humidity variations. The coating does not tarnish over time and protected from rust.
